v1.1

November 2008

Canadian Town Names

This is a set of Canadian Town Names, Coast to Coast and includes 4 regional/provincial subsets as well as Malamute Madness.

Yet another one of the sets in the Canadian/American suite of graphic sets.

It complements the Canadian Trains Set, Canadian Stations Set and North American Cities Set and North American Roads, although they are not required.

Compatible Platforms :

The set is compatible with OpenTTD v0.6 / v0.7 (nightlies) [r10211+], TTDPatch 2.5 beta 5 as well as TTDPatch 2.6 alpha.

Looking for the set ...

Listed on **GRF Crawler**

http://grfcrawler.tt-forums.net/

Canadian Town Names

Why ?

1) I'm Canadian, eh!
2) The Canadian Trains Set, Canadian Stations Set, North American Cities Set and North American Roads Set looked rather naked without some good Canadian community names.
3) I wanted to give something back to the community and I ran out of Moosehead.

What is it ?

It's a graphics file [.grf] containing a list of Canadian town names.

But it's something more too.

Canada is a large country with diverse regions, history and cultures that are largely reflected in the names of its communities. Hence, this set offers not just a list of Canadian names but also groupings largely based on its regions.

Hidden under the covers of CaNames.grf, where you can't see them or mess with them, the names are grouped into Capitals, Major Cities, Canadian Stations Set names, and assorted town names from each province and territory.

For a detailed list of included town names see appendix at the end of this guide.

How to use it ?

When starting a game, select the 'Game Options' window and in the 'Town Names' drop down list, you will find "**Canadian** ..." (which is the same as ".O Canada") and the following options:

- **O Canada** (te/ar) - The names are from all across the country - from the Atlantic Ocean to the Pacific shores, from the American border to the North Pole. (Back off Moscow! It's ours!). Recommended for Temperate and Arctic scenarios [as indicated by te/ar].

- **Rocky Mountain Plains** (ar) - The provinces of British Columbia, Alberta, Saskatchewan, Manitoba and the Yukon territory. Ideally suited for Arctic scenarios with high mountain snows and blizzards across the prairies, but equally at home in the Temperate climate of the Pacific Coast of British Columbia giving access to all those rich Asian markets.

- **Golden Horseshoe** (te) - Ontario, the commercial and industrial heartland of Canada, with Toronto at its apex, it surrounds Lake Ontario like a horseshoe made of gold. Recommended for Temperate scenarios but equally at home in a cold Arctic winter.

- **La belle province** (te) - Québec - Ici on parle français - A unique set of names, mostly in Canada's other first language. Industrially diverse and well blessed with resources, it is an island of francophonie in a sea of anglophones. It is also the home of Bombardier whose equipment appears in so many TTDX sets. Temperate but of course mais avec un petit goût de l'arctique.

- **Maritimer Bys** (te) - Newfoundland & Labrador, Nova Scotia, Prince Edward Island and New Brunswick, Canada's East coast with lots of fish, lots of forests, lots of oil and lots of gas. Bys is whats we calls our young men before they's mens ... It's also what we says to 'em when dey leaves home for dem high paying jobs out West. Largely Temperate, but you'd swear it wasn't when one of them Nor'Easters blows in off of the Atlantic in the middle of winter.

- **Malamute Madness** (tr) - The Northwest Territories and Nunavut, largely above the Arctic circle, recently blessed with diamond mines, but they have no rail service. The closest they come to a train is a dozen or so 0-4-0 Malamutes pulling a sled across the tundra. Not a lot of towns up there so we filled out the list with some of Canada's stranger, funnier names, and yes, they are all real. As a tribute to Global Warming, we recommend this one for Tropical. It also helps to think of warmer places during a night when the next sunrise is six months away. So crawl into your igloo and crank up your laptop ... Transport Tycoon Deluxe is waiting.

Note : in OpenTTD, the menu option names are slightly different, but functionality is the same.

Installation and Configuration :

OpenTTD : add CaNames.grf to the \DATA directory and activate the set in 'NewGRF Settings' on the title screen.

TTDPatch : add CaNames.grf to the \NEWGRF directory and add the entry 'newgrf\CaNames.grf' to the newgrf.cfg file, found in the game directory.

This set does not require any particular position in newgrf[w].cfg (TTDPatch) or NewGRF settings window (OpenTTD), anywhere will do.

The set must be active/activated on the title screen and must remain active during the game, although no selection changes are possible once a game has started; and it only works with new games.

Parameter Settings :

** There are no parameters to worry about **

How to Activate / Use Custom Town Names :

Before starting a new game; on the title screen select 'Game Options'; on the game options window open the 'Town Names' drop down menu and select one of the many town name sets listed. Then exit the Game Options window an start a new game. Please note custom town names work only with new games; it has no effect on saved games or playing a scenario; although a scenario designer can use them while creating a scenario; however, s/he must make it clear that playing the scenario requires the set to be activated.

In TTDPatch :
Canadian Town Names follow the 'Canadian ...' entry; with 'Canadian ...' and 'O Canada' being the same.

In OpenTTD :
Canadian Town Names are preceded by 'CA-'; this has been added, so that they stick together, due to list sorting in OpenTTD.

Credits :

Conceived by Wallyweb [including user guide], coded by OzTransLtd; with Québec contributions from CPCNMAN007, a category suggestion by lifeblood, plus several suggestions from other members as posted in our tt-forums thread.

A special thanks to DanMack for getting this whole Canadian thing going in the first place.

Technical Information :

Name : Canadian Town Names

Version : v1.1 [21 November 2008]

Graphics ID : 43414E61

Active Sprites : [none]

TTDPatch vs OpenTTD :

Differences between the 2 platforms, they are :

- Drop down menu options vary slightly, but there are no differences in functionality.

Known Issues :

The following are issues that have not been resolved yet :

   [none as yet]

Update History :

v1.1 – Minor update [21 November 2008]

- added Ainsworth, Beaverdell, Castlegar, Christina Lake, Cranbrook, Creston, Erickson, Fruitvale, Grand Forks, Greenwood, Midway, Needles, Nelson, Rossland, Trail (all towns in BC) to Rocky Mountain Plains.
- re-weighted probabilities.
- updated user guide.

v1.0 – Final Release [27 June 2008]

v0.9b – Minor update [19 January 2008]

- corrected some spelling mistakes.
- added Marsh Lake (YT) to Rocky Mountain Plains.
- added Florenceville (NB) to Maritimer Bys.
- updated user guide.

v0.9a - Initial Release [1 January 2008]
